## CATALOGUE ARRANGEMENT

The Home Renovation Catalogue is divided into three sections.

### Section I: Publications

Listed here are titles of pamphlets, booklets, brochures and 'fact sheets'. Titles are listed alphabetically under each province or territory. Publications produced by the federal government, national associations and national manufacturers or hardware suppliers are listed (alphabetically) under the heading "National".

Each record contains the following information:

- -record number
- -title
- -author
- -date of publication
- -distribution
- -subject (given in parentheses)

Note: If a publication has more than one author, all authors are listed in the record. The order in which authors are listed does not represent primary or secondary authorship. Authorship was not always clear and the name(s) given on the front or back cover of a publication were used to establish authorship.

A (*) after a title indicates the publication is available as a separate French publication. Bilingual publications include both the French and English titles.

### Section II: Audio-Visual

Titles are listed alphabetically under each province or territory. Videos and/or slides produced by the federal government and national bodies are listed under the heading "National". Each record contains the following information:

- -record number
- -title
- -author (i.e. producer of videos or slides)
- -subject (given in parentheses)

Note: Several video titles were listed in the Alberta Energy Conservation Branch "Audiovisual Library Catalogue". The producers' province of origin was unknown. These video titles are, therefore, listed under the heading "Alberta".

Section III: Courses

Courses offered by each school or college are listed alphabetically under the institutions' name. Each record contains the following information:

-record number
-title of course
-subject (given in parentheses)

Author Index

All publications, videos and/or slides produced by each author are listed, alphabetically, under the author name. Each record contains the following information:

-title
-co-author (for publications) or co-producer (for audio visual titles)
-date
-subject
-format (i.e. publication or video)

Subject Index

Reference numbers refer to record numbers, not page numbers. Subject references are to publications, audio-visual titles and courses.

Addendum

Included here are titles of publications (and one course) received after time of printing. These additions have been included in the subject index. Record numbers for these publications are preceded by the letter "A" (e.g. A001).
